Allowable Subject Matter

Claims 1-14 and 28-43 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art does not teach or suggest a process of etching a ball-limiting metallurgy (BLM) stack comprising etching a BLM stack disposed over a metallization, in the presence of a nitrogen-containing heterocyclic compound, an ammonium hydroxide compound, an oxidizer, and a metal halide compound, as in the context of claim 1.

The closest prior art, David et al, discloses etching a BLM stack with an etchant and David teaches several etchants, however there is no suggestion to use the combination cited, that of a nitrogen-containing heterocyclic compound, an ammonium hydroxide compound, an oxidizer, and a metal halide compound to etch a BLM stack disposed over a metallization, as in the context of claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
